

LDLC400 Series 400nm Long Coherence Diode Laser System up to 50mW

Overview

The LDLC400 series diode laser is ideal for applications that require a wavelength of 400nm and output power levels up to 50mW. The laser features narrow spectral linewidth, stable wavelength, ultra-compact design, long operating lifetime, easy operation and FDA-compliant system with driver. The laser is widely used in holography, interference, fluorescence, photoetching, flow cytometry, DNA sequencing, Raman spectroscopy, laser radar, precision measurement, and many other applications.
