

QAOS349 Series 349nm Actively Q-Switched Laser System up to 8uJ

Overview

The QAOS349 series DPSS actively Q-switched AOM (Acousto-Optic Modulation) UV laser is ideal for applications that require a wavelength of 349nm with single pulse energy levels up to 8uJ. The laser is constructed with features of high peak power, high repetition rate and short pulse duration. The laser is widely used in material processing, measurement, scientific research, and many other applications.
