

SLM1064 Series 1064nm Single Longitudinal Mode Laser System up to 1000mW

Overview

The SLM1064 series single longitudinal mode laser is ideal for applications that require a wavelength of 1064nm and output power levels up to 1000mW. The laser features narrow spectral linewidth, long coherent length, ultra-compact design, long lifetime, easy operating, and FDA-compliant system with driver. The laser is widely used in DNA sequencing, flow cytometry, cell sorting, optical instrument, spectrum analysis, interference, measurement, holography, physics experiment, and many other applications.
